

Invitation to Participate in the

## **Town of Amherst**

# **Downtown Pedestrian Safety and Walkability Study**

-----

All Town residents, property owners and business operators as well as other individuals who are interested in the matter are invited to a public meeting on the

**Town of Amherst Downtown Pedestrian Safety and Walkability Study**

that will be held

**4 – 6 PM on October 18, 2016 in the Town Hall at 174 S. Main Street.**

This session will be conducted by consultants in an open house format where the following would be discussed:

- Phase 1:** Work that VDOT will need to do in support of its project to mill and repave N. Main Street and S. Main Street in 2017. This work is expected to include curb and gutter repairs and improved handicap ramps as well as an improved situation at the traffic light.
- Phase 2:** Different pavement striping to involve crosswalk markings, on-street parking space layouts, safety and channelization areas and bicycle lanes.
- Phase 3:** Altered curb locations that are intended to promote pedestrian safety and provide opportunities for future streetscape elements.

Graphics depicting Phases 2 and 3 are attached (there is no graphic for Phase 1). Larger editions are available for review in the lobby of the Town Hall until the meeting and then available for discussion during the session.
